

DECI-TEX®

Premium Acoustic-Based Technology.

L&L Products offers acoustic solutions designed to reduce sound reverberation, eliminate echoes, and provide high sound damping properties for architectural spaces. Products can be used as decorative panels and are easy to install using attachments. Meets UL-94 and V0 flammability.

DECI-TEX®

The Lightweight Acoustics Solutions with Superior Performance.

DECI-TEX® delivers premium acoustic performance at lower weights and thicknesses. DECI-TEX® engineered fiber solutions yield high resilience and achieve superior mechanical integrity over other forms of nonwoven insulation. Available in a variety of profiles, thicknesses, sizes, and decorative facings.

The thermo-formed, polyester fiber-based, acoustic panel are well-suited to absorb “slap echo” often associated with poor room acoustics an alternative to existing virgin cross-laid and MDF boards. The acoustically tuned sheets range in thickness and surface densities of 400 gsm – 2,000 gsm (10-75 mm). The engineered lapped blankets of acoustic fibers, which provide exceptional acoustic absorption properties, reduce ambient noise and eliminate echoes and sound reflections across the room as a standalone solution or paired with other L&L Acoustic sound absorbers.

KEY PRODUCT ATTRIBUTES

Lightweight

Odorless

Water
Resistant

UV Resistant

Recyclable

Fire
Resistant

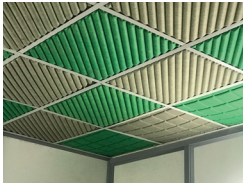

Sound
Absorption

Materials

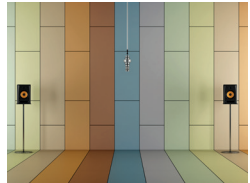

APPLICATIONS

- False Ceilings
- Ceiling Treatments

- Office Separation Walls
- Wall Panels

- Decorative Walls
